

EXPRESSION OF INTEREST

Department of Governance Reforms - Punjab

Eol reference number: PSeGS/PAWAN/2018/01

Eol for high speed last mile connectivity solution FOR VERTICAL/ HORIZONTAL EXPANSION OF PAWAN NETWORK to connect government offices, service delivery centers and other important sites in the State.

D - 241, PHASE 8B, INDUSTRIAL AREA, SECTOR 74,
MOHALI, PUNJAB

INTRODUCTION

The Government of Punjab has established Punjab State Wide Area Network (PAWAN) which has 193 Points of Presence (PoPs). PAWAN is integrated with NICNET using 1Gbps high speed wired connectivity up to all the 22-district headquarters. From district headquarters to Sub Divisional Offices, connectivity of 2/4 Mbps wired connectivity is available. However, the State is planning to migrate this to the proposed solution.

The State is interested in going for a cost effective high speed, secured and dedicated connectivity solution for all kinds of its data / audio / video / collaborative applications.

The solution would use existing connectivity of 1Gbps which is available at district headquarters and take it to around 2500 identified urban / semi-urban / rural locations of various departments across the state in the first phase. Since the State would be using its own connectivity, there will be no requirement of the paid bandwidth. As part of the solution, the solution provider would guarantee a minimum bandwidth of 50 Mbps through its proposed solution (media) at all of these locations.

Punjab State e Governance Society (PSeGS), Department of Governance Reforms (DGR) invites Expression of Interest (EoI) from IT/ Telecom Solution Providers for enabling the last mile connectivity to identified urban / semi-urban / rural locations as per the detailed features as contained in this document.

The Expression of Interest further seeks response regarding the solutions, technologies, topologies, specifications and details of past similar experience for execution of such a project.

DISCLAIMER

The issue of this document does not in any way commit or otherwise obliges PSeGS/ DGR to proceed ahead with all or any part of a pre-qualification empanelment process.

DGR may, at its absolute discretion, shortlist, accept, disqualify, elect to abandon, reject any part or whole of the process without giving prior notice to the proponents or potential proponents. DGR / PSeGS reserves the right to cancel the EoI in totality without assigning any reason at any point of time.

This document is only for preparation and selection of right technology and methodology for procurement. PSeGS/ DGR is in no way bound to limit its business enquiry / circulars to empaneled supplier(s) only.

The applicants here to agree that the Arbitrator designated by the State Government shall have the exclusive jurisdiction to settle any or all disputes which may arise out of or in connection with this EoI.

SCOPE OF WORK

There are approximately 2500 (out of approximately 10000 sites) identified urban / semi-urban / rural locations of various departments across the state in the first phase to be connected with existing PAWAN Network. District-wide list of sites along with the coordinates may be seen at **Annexure-1**.

The objective of this EoI is to solicit responses from interested parties regarding the solutions, technologies and specifications available in the market for execution of such a project which may include but not limited to:

1. Existing Network

The existing PAWAN network is available in District Headquarters (DNC) i.e. DC Office premises. All the 22 Districts are already connected with State Network Operations Center (SNC). Each DNC will function as a PoP (Point of Presence) for the envisaged Horizontal Connectivity. The PAWAN IP Schema will be used for envisaged Horizontal Connectivity.

2. Requirement of each location

1. Minimum 50 Mbps (50 Mbps uplink and 50 Mbps downlink) speed required from each DNC to identified location covered under that DNC.
2. Low latency <10ms.
3. Traffic segregation using VLAN / MPLS / Routing.
4. Quality of Service (QoS) for prioritization of Voice & Video Network.
5. Bandwidth Management for each location (CIR/MIR).

Proposed Applications

Video Conferencing

IP Telephony

Surveillance

Cloud/Virtualization/VM Based Applications

Response to the EoI

The responses are invited from interested agencies with similar experience in the last 5 years using the proposed solution.

The response to the EoI should specify the following:

1. Information about the organization (company profile, relevant experience and case studies, any additional information)

Experience of work for similar kind of project with details of technology used and case study. The identified location can be connected with adjacent District PoP also, instead of home District PoP, in case it has better feasibility with adjacent district. e.g. Phagwara has better feasibility from Jalandhar instead of Kapurthala. PAWAN IP Schema will be used to ensure a single network for the State.

2. Power supply & space for installation / commissioning of media will be provided by respective department.
3. Understanding of the envisaged network in terms of technology / methodology.
4. Write-up on the approach and methodology for implementation, operations, and maintenance of the project for next 5 years. Resources (proposed technology certified) will be required to be deployed in the State i.e. one resource in each District for day to day Network Operations, Management and Monitoring of all the links.
5. 99% Uptime is required.
6. High Level and Low Level Designs with details of equipment for the proposed solution as per the Scope of Work.
7. Detailed Bill of Quantity (i.e. list of components used in the proposed solution)
8. Schedule for execution of the project (i.e. project deployment plan for delivery and implementation)
9. The old infrastructure with PAWAN project will be reused wherever possible.
10. Service and support escalation flowchart for the mentioned uptime.
11. Tentative cost of solution including maintenance for 5 years
12. The interested parties may also submit the details of all pre-requisites (if any) required from dept. / user end (i.e. prerequisites in terms of

corresponding IT infrastructure at site, necessary approvals for excavation of roads and associated activities etc.)

13. Flowchart information about the organization (company profile, relevant experience and case studies, any additional information). The interested parties may also submit the details of all pre-requisites (if any) required from dept. / user end (i.e. prerequisites in terms of corresponding IT infrastructure at site, necessary approvals for excavation of roads and associated activities etc.)

Submission

Interested parties should furnish their interest through email at pawan.support@punjab.gov.in and they will be required to give a detailed presentation about the proposed solution to the committee on 17th Oct, 2018 at 10am at DGR office (Address: Plot D-241, Phase 8B, Industrial Area, Sector – 74, Mohali). For any further queries, please feel free to Sh. Sumeet Garg, SM at 9872077754 .

Based on the inputs of EoI and other sources, PSeGS/ DGR shall decide the further methodology and technology for the implementation of the envisaged project.

Date of issue of EOI: 06-10-2018
